Project overview

The Learning Management System (LMS) mobile application is designed to provide a comprehensive platform for educational institutions, instructors, and students to manage and engage with online courses. Built with a modern tech stack, the application leverages Expo Router and React Native for the frontend, ensuring a seamless cross-platform mobile experience, and Node.js with Express and MongoDB for a robust and scalable backend. The system facilitates course creation, lesson management, user authentication, and real-time interactions, making it a versatile solution for e-learning.

I. Objectives

- Develop a user-friendly mobile application for managing online courses.
- Ensure secure authentication and data management.
- Provide real-time notifications and media integration for an enhanced learning experience.
- Create a scalable and maintainable codebase for future enhancements.

II. Target Audience

- Educational Institutions: To manage courses and track student progress.
- Instructors: To create and deliver educational content.
- Students: To access courses, lessons, and notifications on mobile devices.

Features

The LMS application offers a comprehensive set of features to support online education:

I. User Authentication

- Secure login and registration using JSON Web Tokens (JWT).
- Password encryption with bcrypt for enhanced security.
- Role-based access control (admin, instructor, student).

II. Course Management

- Create, update, and delete courses with detailed metadata (title, description, category).
- Enroll students and manage course rosters.
- Categorize courses for easy navigation.

III. Lesson Creation

- Add and organize lessons within courses, including text, video, and quizzes.
- Support for rich media content with Cloudinary integration.
- Lesson progress tracking for students.

IV. User Profiles

- Personalized profiles with customizable settings (e.g., profile picture, bio).
- View enrolled courses and progress.
- Role-specific dashboards for admins, instructors, and students.

V. Notifications

- Real-time push notifications for course updates, new lessons, and deadlines.
- Configurable notification preferences for users

VI. Responsive UI

- Modern, intuitive interface built with React Native Paper components.
- Cross-platform compatibility for iOS and Android.
- Adaptive layouts for various screen sizes.

VII. Cloud Storage

- Integration with Cloudinary for secure media storage and delivery.
- Support for images, videos, and documents in courses and lessons

Technical Architecture

The LMS is built using a modern, scalable tech stack to ensure performance and maintainability

I. Frontend

- **React Native:** Cross-platform framework for iOS and Android.
- **Expo Router:** File-based navigation for seamless routing.
- **React Native Paper:** UI component library for consistent design.
- **Axios:** HTTP client for API communication.

II. Backend

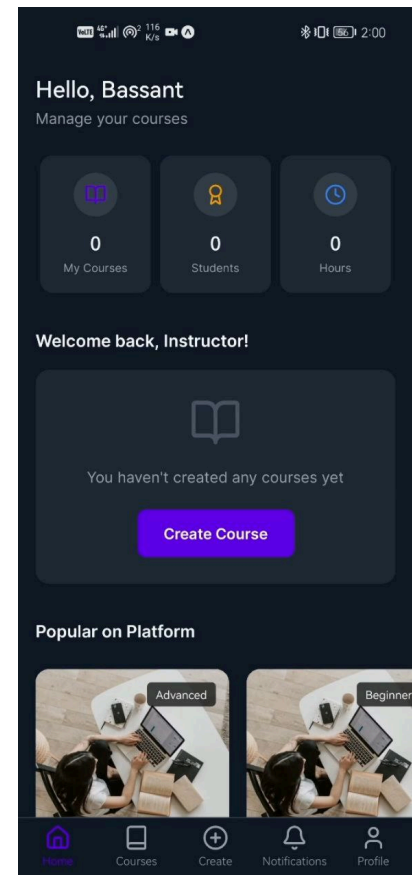

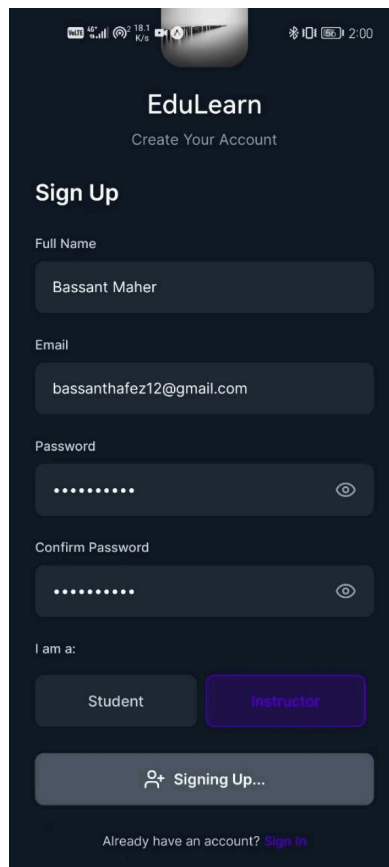

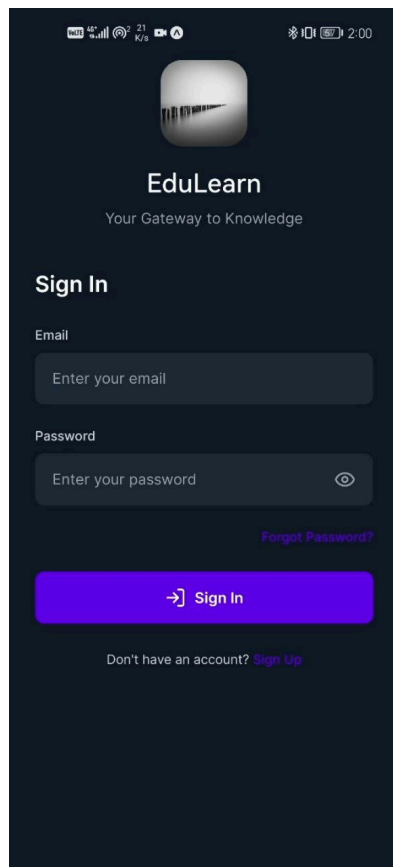

- **Node.js with Express:** RESTful API for handling requests.
- **MongoDB:** NoSQL database for flexible data storage.
- **Mongoose:** ODM for structured MongoDB interactions.
- **JWT:** Secure authentication and authorization.
- **Multer & Cloudinary:** File upload and cloud storage management.

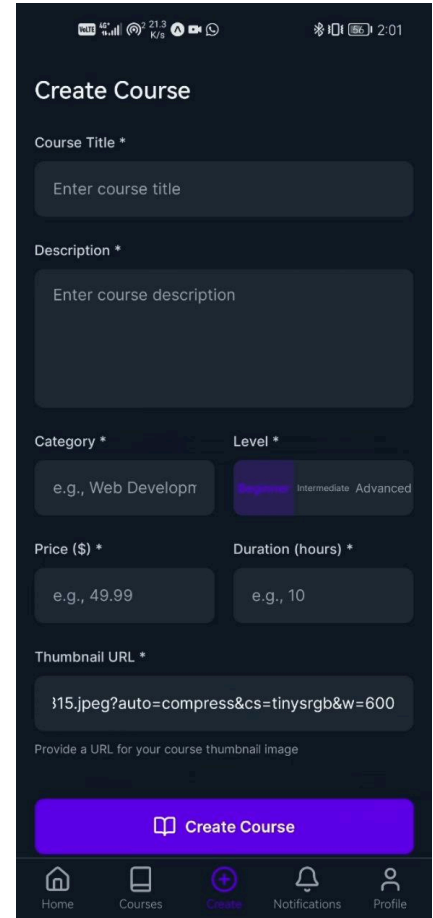

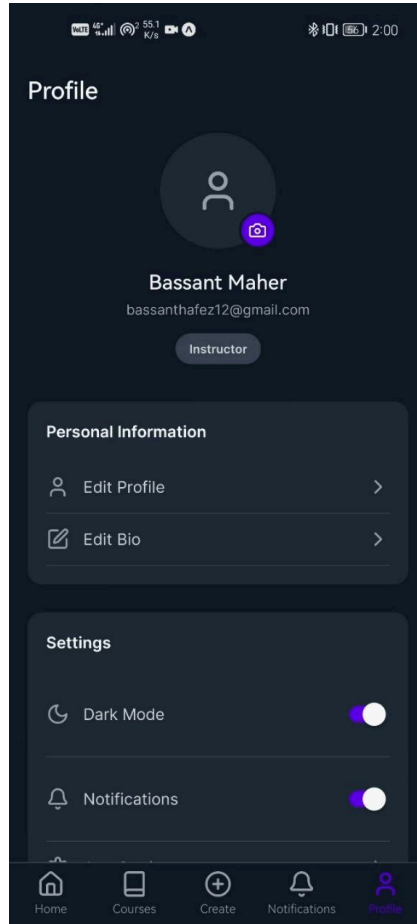

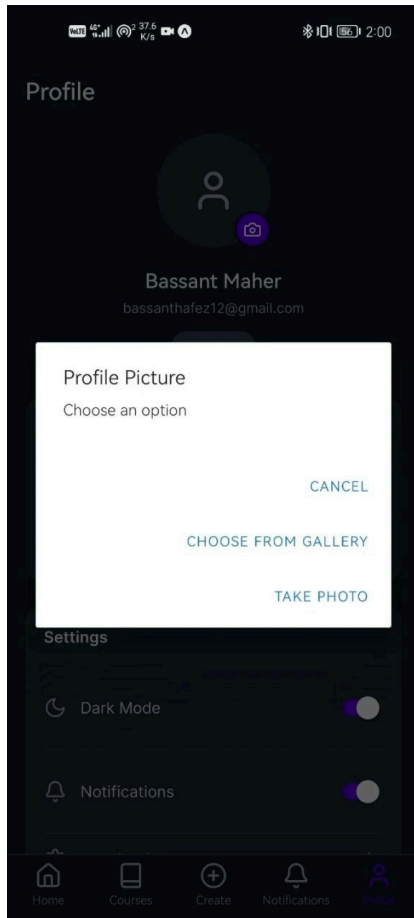

III. System Architecture

The application follows a client-server architecture:

- **Client:** React Native mobile app communicates with the backend via RESTful API.
- **Server:** Node.js server handles business logic and data operations.
- **Database:** MongoDB stores user data, courses, and lessons.
- **Cloud Storage:** Cloudinary manages media content

Conclusion

The Learning Management System (LMS) provides a modern, scalable, and user friendly platform for online education. By leveraging React Native, Expo Router, Node.js, Express, and MongoDB, the application delivers a robust set of features, including secure authentication, course management, and real-time notifications. The project's modular structure, agile development approach, and comprehensive testing ensure maintainability and reliability. Future enhancements will further enhance the platform's capabilities, making it a versatile solution for educational institutions worldwide
